

Cut post-site reporting time in half

Report smarter, not harder.

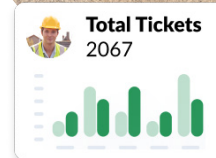

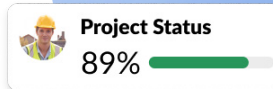

If your on-site teams are spending more hours in front of a computer than at the project site, then it's time for a new approach to post-site reporting.

PlanRadar eliminates sifting through illegible handwritten notes or trying to find the right photo in your camera roll. Everything is captured in one platform, formatted into client-ready reports in seconds.

Spend less time editing reports and more time where it matters most.

“PlanRadar has enabled our site inspection teams to gather site data quickly and efficiently, whilst significantly reducing the time required to process and present this data.”

Angus Elliot, ARUP

Why choose PlanRadar?

Quick setup

Get started immediately using our intuitive app. Onboard full teams in less than a week.

Fully flexible templates

PlanRadar adapts to the way you work, not the other way around. Capture and report data for any use case, in any format.

Easy-export reports

Final, client-ready reports are generated in just a few clicks. Gain speed without losing accuracy.

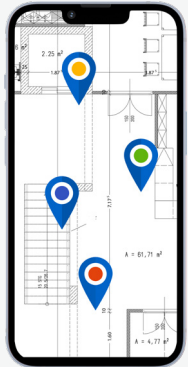

Easy to use

Our platform is powerful yet simple to use. In fact, 75% of our user base chose PlanRadar because it's more user friendly than our competition.

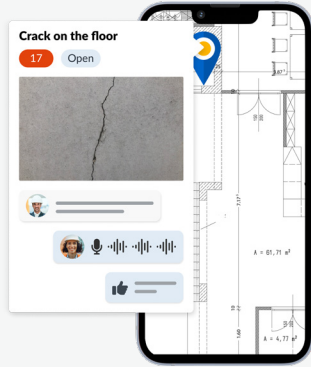

5 simple steps for on-site data capture, reports & collaboration with teams

1

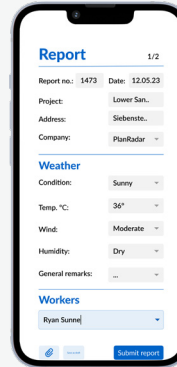

On-site inspections become effortless, with all information tracked on-plan

2

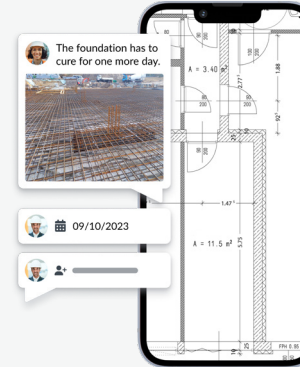

Add photos, videos & voice notes for detailed and clear documentation

3

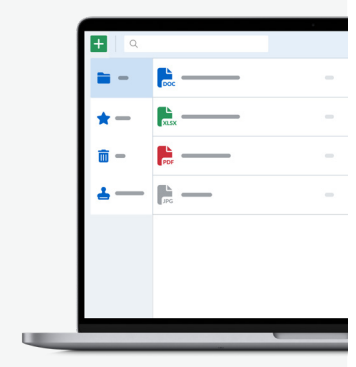

Generate reports using fully-flexible templates to match any format

4

Communicate in one platform. Share updates with developers or delegate issues to contractors for resolution

5

Own all project data with all reports, plans & documents stored in one place

Full construction management in one platform
