

Deliver high-quality construction on-time and on-budget

Streamline your construction projects with digital documentation, communication, and reporting

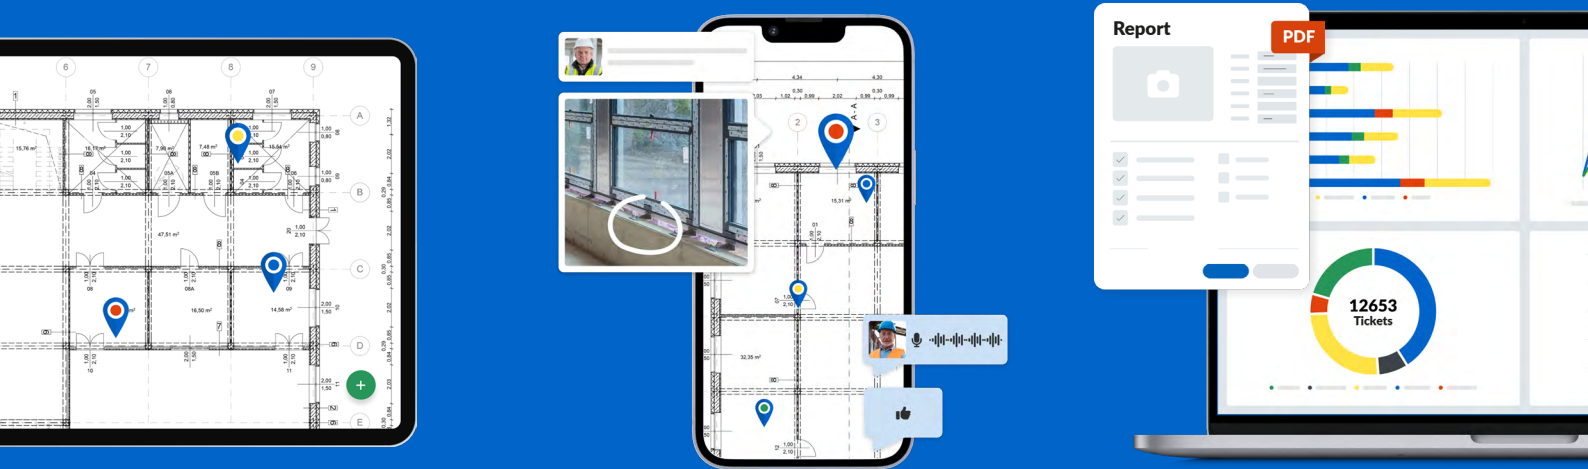

Fully adaptable digital platform to all construction processes

Easy to use – onboard your full team in less than a week

Complete construction management in one platform

Track

Document all construction processes, on-plan

Connect

Simplify team collaboration & oversight

Solve

Keep projects on-track with real-time insights & reports

Fully flexible to meet your exact construction processes

Task & subcontractor management

Quality assurance, inspections & safety audits

Claims management & evidence collection

Defect management

Site diaries

Handovers

Link the project site to all workflows **in one platform**

Plan & BIM Management

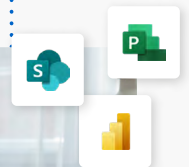

Connect pre-construction and design into the build phase with the latest plans & BIM models.

Document Management

Store, manage & approve versions of plans & documents in one place.

Integrations

Integrate your existing software with easy no-code automations or our open API.

Reporting & Insights

Identify opportunities and project issues with custom progress reports in real-time.

Scheduling

Align project progress with the schedule and visualise key milestones and dependencies.

96% of our customers report a positive experience with PlanRadar*

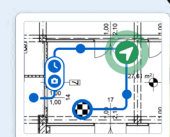

91% of subcontractors say PlanRadar is easy to use*

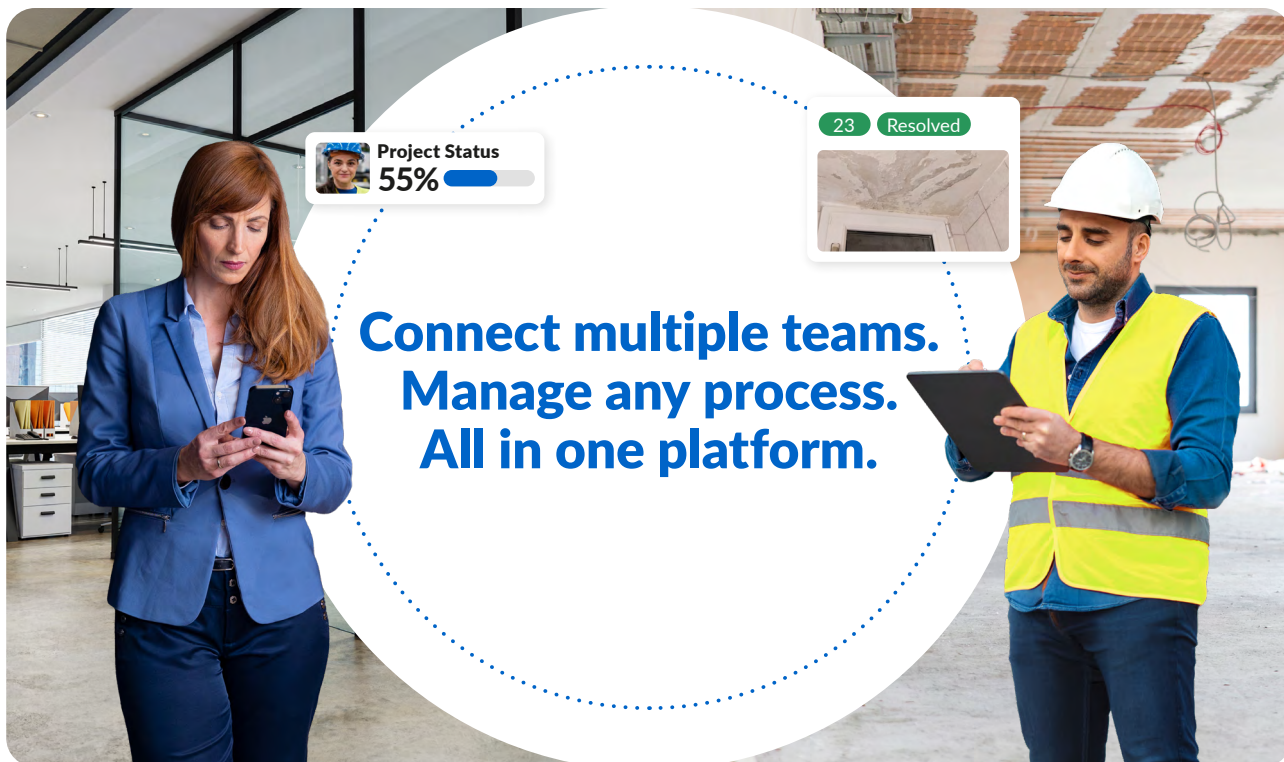

*PlanRadar Annual Customer Survey

360°

SiteView

360° images captured during a site walk are automatically mapped onto a 2D plan. Maintain visual progress & as-built documentation for full transparency and reduced rework.

Improve efficiency & collaboration for high-quality construction

94%

of customers say PlanRadar helps deliver high-quality projects*

91%

of customers say PlanRadar increases productivity*

89%

of customers say PlanRadar improves communication between the office and project site*

Free subcontractors – pay for your core team, involve your whole team

Easy-to-use interface keeps it simple for your team to get started

Available across all devices – iOS, Android, Windows and web browsers

Highest security & data protection standards

We are very impressed with the ease of use on the go and the good clarity in the app. The 3D view and easy navigation within BIM models enable faster and more detailed identification and communication of facts."
